Salesforce Sales Meeting Booster Add-on

Add a Sales Visits Booster into Salesforce

The proposed solution has been built to optimize sales journey and increase the number of visits by day. It handles customer experiences. It is a configurable tool and integrated with touch screen phones.

Increase the number of visits

All sales studies are showing that there is a correlation between the number of visits and sales revenues.

Increasing the number of visits can be planned using a map and list based on proximity.

The tool can also be used proactively during visits.

Better customer experiences

It follows up parallels phones calls to avoid double call the same day for a better customer experiences.

Phone campaign performance

Follow-up your call campaigns performance by status.

Fast entry of status, events

Enter status, comments and call results in a glimpsed.

Extend your requirements

The solution is configurable.

Number of Visits Booster

The free version includes the following functions.

Campaign management

All documents are relating to a Salesforce campaign.

Quick access

You have direct access to status, comment and log a call function.

Resisable view

Works on all phone screens but better on tablets and PCs.

Clic to call

Handles touch screen call on phone.

Clic to email

Handles touch screen email.
